

## ENVIRONMENTAL SUSTAINABILITY POLICY

At TIS, we believe that the protection of the ENVIRONMENT is a primary and essential area of action for carrying out our activities as freight forwarders and transporters at a National and International level.

For this reason we consider the objective of applying a system over time as a strategic factor Environmental Management (EMS)

according to the international standard UNI EN ISO 14001 2015.

The company intends to establish action lines to improve environmental efficiency in order to implement a system that enables the following:

- to guarantee constantly the compliance with the environmental regulations in force (T.U.A. Legislative Decree 152/2006 and ss.mm.ii.)
- to prevent the onset of critical environmental issues in the management of one's processes (risk-based thinking)
- to improve constantly the environmental performance (P-D-C-A cycle), controlling and decreasing, to as much as possible, energy consumption and emissions into the atmosphere
- to promote recycling and correct waste disposal
- to guarantee open and collaborative relationships with local authorities and with those who live with the impacts of own business
- to ensure a choice of materials and products such as to guarantee safe use and disposal compliance with current legislation and the principle of environmental sustainability

For this reason in T.I.S. :

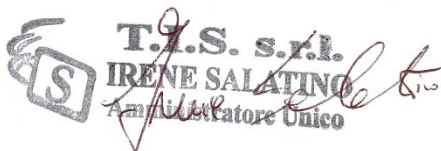

- ♣ we carry out the assessment of the environmental context in which and on which the company activity tends to impact internally and externally
- ♣ we carry out the analysis of environmental aspects with a potentially critical impact by evaluating the risks
- ♣ we plan administrative management activities and the management of office and operational production processes to limit negative environmental impacts on the one hand and to improve environmental performance on the other
- ♣ we identify and involve human, instrumental and economic resources necessary for the management of System;

♣ we ask managers and staff for constructive participation in the functioning of the System of rules necessary for the pursuit of objectives.

With this regard, our organization evaluates and monitors the effects of its activities and examines them periodically with all the significant impacts of this activity on the environment in general. Based on the results and from time to time, adopts preventive measures necessary to eliminate or reduce the identified environmental impacts, limit the pollution, preserve resources by taking into account green processes, technological progress, of possible clean technologies, i.e. resorting to the use of all useful measures to protect the environment.

In T.I.S., with a view to the principle of continuous improvement, we concentrate our efforts on pursuing the OBJECTIVES specifications that are defined annually. The achievement of these objectives, through internal methods identified in environmental management programs, will allow pollution prevention to be pursued and other damage to the surrounding environment. This Policy represents the reference document for establishing and reviewing the objectives and related objectives environmental goals, appropriately documented within the environmental management system adopted.

This Policy is adequately disseminated, kept active and operational within the organization
